Heimadæmi 10 - Forritunarmál (Einstaklingsverkefni

Magnús Daníel Einarsson

October 2023

1.

[1,4,9,16,25]

2.

```
{-
Usage: powerList n
Pre: n is an integer, n>=0.
Value: The list of all sublists of the list
(1 2 ... n).
This is a list that contains 2^n
sublists.
-}
import Data.List (subsequences)

powerList :: Int -> [[Int]]
powerList n = subsequences [1..n]

main :: IO ()
main = do
    let n = 4
    let result = powerList n
```

[[],[1],[2],[1,2],[3],[1,3],[2,3],[1,2,3],[4],[1,4],[2,4],[1,2,4],[3,4],[1,3,4],[2,3,4],[1,2,3,4]]

```
main :: IO ()
main = do
    let n = 1
    let result = powerList n
```

[[],[1]]

Næsta mynd er fyrir Kjartan þegar hann fer yfir þetta verkefni og ætlar að gefa mér 0 fyrir eitthvað sem er leyfilegt.
